

Concrete Masonry Presentations - AIA/CES Registered

C103Da - Introduction to Concrete Masonry Production

This program provides a brief overview of production methods for concrete masonry units.

C104Da - Concrete Masonry Overview

This presentation covers a basic overview of concrete masonry systems and materials

C201Db - Concrete Masonry Codes, Standards, and Specifications

This presentation introduces the various codes, standards, and specifications that govern concrete masonry units, materials, design, and construction.

C202Da - Fire Safety

This course addresses the statistics associated with fires, discusses the balanced design of fire resistance for buildings, suppression and detection systems, as well as fire testing procedures and methods for determination of fire resistance ratings for concrete masonry assemblies including code approval calculation methods.

C204Da - Grouting Concrete Masonry Assemblies

This presentation addresses the requirements and procedures of grouting concrete masonry wall systems per the I-Codes and the Masonry Standards Joint Committee (MSJC).

C205Da - Crack Control in Concrete Masonry Walls

This presentation addresses the proper application of empirical crack control measures into concrete masonry wall systems as presented in NCMA TEK 10-2C.

C301Da - Introduction to Sustainability: Concrete Masonry and Sustainability Programs

The topic of sustainable construction and 'green' building has become a market driver in recent years.

C302Da - Architectural Enhancements with Concrete Masonry

This presentation discusses the aesthetic benefits and options available when using concrete masonry materials and construction.

C305Db - Moisture Penetration Resistance of Concrete Masonry

This program provides a general overview of strategies to provide moisture-resistant concrete masonry assemblies, including material requirements and quality design and construction practices.

H101Da - Introduction to SRW Systems

This presentation covers a basic overview of segmental retaining wall systems and materials.

Ready Mix Concrete Presentations – LU's available

Troubleshooting Concrete

Concrete A-Z

Concrete Curling

Insulating Concrete Forms (ICF) for Commercial Construction – Build With Strength

How we can move beyond building things that meet the lowest common denominator of “CODE COMPLIANCE” and actually build better in an affordable and cost-effective way with Concrete and Insulating Concrete Forms.

Chandler Concrete Introduction

Overview of Chandler Concrete Products, Applications & Service Areas

Solid Solutions – Versa-LOK Product Line & Applications – NCLA LU

Overview of SRW's & Why Walls Work
